

## User guide webshop ERA Benelux

With proud, we present you our **renewed and improved web shop**.

This new web shop is again fully based on Tecdoc, and has some important **advantages** in comparison with our old webshop.

First of all, we changed a bit the **lay-out**, which gives you a better overall view, and makes it more easy searching our parts.

After selecting the part number, the actual availability of the part requested is automatically displayed.

On this page, you also find the gross price of the part requested, but also **the price of the old core**. To see this, you just go standing with the mouse onto the price.

The screenshot shows the product page for 'Steering Gear' with article number SR23294. The table has columns for 'Illustr.', 'Article Number', 'Description', 'Status', and 'Gross'. The 'Status' column contains a green circle icon, which is circled in red. A tooltip is displayed over the 'Gross' price, showing two price types: 'Standard Price' and 'Core Credit'.

Illustr.	Article Number	Description	Status	Gross

At last it is now possible to **compare different part numbers** with each other.

You can do this by marking the different parts you want to compare (at the left of the picture), and then clicking on 'compare article' on the left top.
